About Company

INFINITY ENGINEERINGS is a premier distributor of innovative building solutions, driving safety, sustainability, and functionality across the construction industry since June 2021. We have established ourselves as a trusted partner for architects, consultants, and builders throughout India through strategic partnerships that include serving as the authorized distributor for Coopers Fire Ltd. (London, UK) for Fire and Smoke Curtains across India, Nepal, Bhutan, and Sri Lanka, maintaining a corporate partnership with Panasonic LED Lighting for comprehensive pan-India operations, and operating as the North Indian distributor for Dormakaba's premium hardware solutions with nationwide service coverage.

Welcome Message

Vikas k Mathur
Founder & Managing Director

When we started this business, it wasn't just about products; it was about protecting the people we care about. As a company, we carefully choose which safety solutions to bring to you.

Every fire curtain, access system, and safety door we distribute represents our promise to help keep your loved ones safe. We don't just sell products; we partner with manufacturers who share our commitment to quality and reliability.

When you call us about protecting your office, school, or home, we see the real people behind that request. That's why we work tirelessly to connect you with solutions that truly make a difference. We're not just distributors, we're your neighbors, parents, and community members who understand what safety means to families like ours.

Vision & Mission

Vision

We put safety first by creating quality products that protect people and buildings. Our eco-friendly solutions are designed to meet each customer's specific needs while caring for the environment.

Mission

At Infinity Engineerings, our mission is to provide cutting-edge building solutions that prioritize safety, energy efficiency and aesthetic appeal. We strive to build long-term relationships with our clients, delivering exceptional service and support.

Meet The Team

Vikas K Mathur

Founder & MD

With over 23 years of experience in the safety industry, Vikas K. Mathur leads our company with a simple philosophy: every product we choose could save someone's life. We only distribute life-saving products that meet the highest quality standards.

Bharti Manchanda

COO

Oversees our day-to-day operations with the precision and care of someone who understands that details matter in safety. From product sourcing to customer service, they ensure every interaction reflects our commitment to excellence.

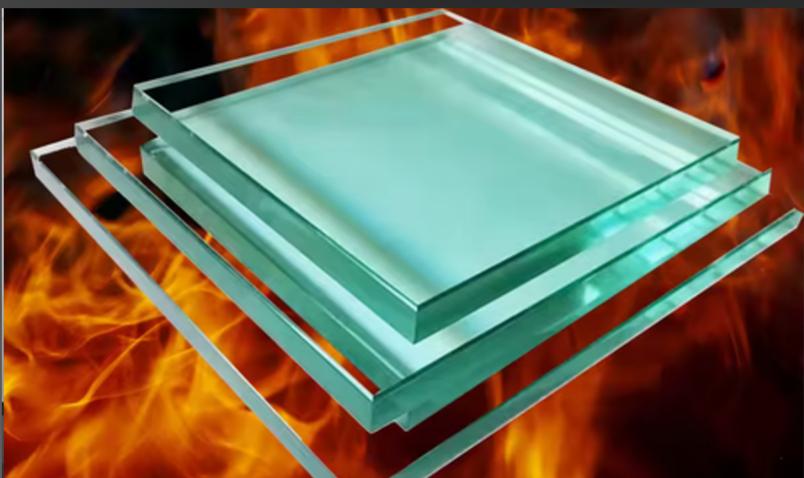

Manisha D.

National Head, Business Development

Leads our nationwide expansion efforts, building partnerships and identifying opportunities to bring our safety solutions to communities across the country. Her strategic vision ensures we can reach more to those who need reliable protection, while maintaining the personal touch that defines our service.

Panasonic LED lighting provides a clear advantage over conventional lighting solutions

Dormakaba India Private Limited

DORMA MAKE – DOOR HARDWARES PRODUCTS / SECURITY FUNCTIONS & VISUAL APPEAL FOR ANY COMMERCIAL BUILDINGS.

Our Products

Fire Curtains/Smoke Curtain

When fire strikes, every second counts, and our advanced **fire curtains** activate instantly to create protective barriers that stop flames and heat from spreading, giving people precious time to evacuate safely. Built with cutting-edge fire-resistant materials, these curtains work automatically or on command to seal off dangerous areas, protecting both your property and the lives that matter most. This isn't just about meeting safety codes; it's about peace of mind, knowing that invisible guardians are seamlessly woven into your space, ready to spring into action and give your family, employees, or visitors the best chance to get home safely.

Certified Fire Resistance Standards

Fire curtains comply with Indian certifications, including BIS standards, IS 15741:2007, IS 1641:1988, and National Building Code requirements.

Flexible and Easy Installation with No Extra Efforts.

There are various types of fire curtains, including vertical and horizontal configurations, each tailored to suit your different architectural and fire safety requirements.

Automatic Fire Compartmentation

They can be deployed automatically when fire detection systems are triggered, creating instant fire barriers.

Our Products

Advanced Fire-Resistant Glass

Cutting-edge fire glass technology creates an invisible lifeline during emergencies, transforming from clear panels into protective barriers that block deadly flames and toxic smoke. When fire strikes, these intelligent glass systems automatically activate, forming insulating foam that maintains visibility for safe evacuation and rescue efforts.

Designed for moments when every second counts, fire-resistant glass keeps escape routes clear and accessible while providing superior protection. You get the transparency needed for daily operations and the fire resistance that could save lives during critical moments.

Superior Insulation Performance

Advanced glass technology provides exceptional thermal insulation, preventing heat transfer and protecting people on the safe side while maintaining clear visibility for emergency responders and evacuation teams.

Multi-Purpose Safety Solution

Combines everyday functionality with emergency protection, serving as regular windows or partitions that instantly become life-saving barriers when needed most.

Transparent Protection

Unlike traditional fire barriers, fire glass maintains visibility during normal operations while transforming into protective foam barriers during emergencies, allowing for rescue operations and situational awareness.

Our Products

LED Lightings

Industrial LED Lightings

Industrial lighting is not just about lighting production lines, machinery, and stocks; it is also about providing light for the people who need it to do their work effectively.

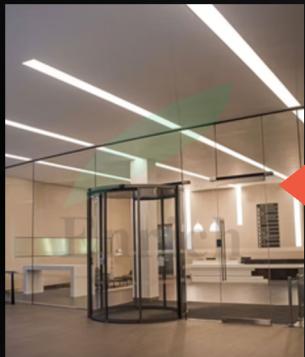

Industrial LED Lightings

Industrial lighting is not just about lighting production lines, machinery, and stocks; it is also about providing light for the people who need it to do their work effectively.

Commercial LED Lightings

Designed for offices, retail, hospitality, and public spaces with a focus on energy efficiency, aesthetics, comfort, and low maintenance.

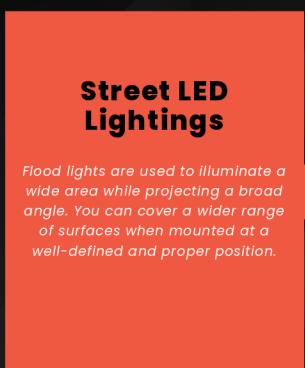

Commercial LED Lightings

It includes baselights, linear lights, downlights, panel lights, track lights, and decorative fixtures.

Street LED Lightings

OUR SITC PROJECT SERVICES

SITC project services handle everything from start to finish. We supply the equipment you need, install it at your site, test that everything works properly, and get it running smoothly for daily use. It's like buying a car and having the dealer deliver, set up, check, and hand you the keys ready to drive.

Supply

We source and deliver all the equipment, materials, and components your project needs. Think of us as your one-stop shop – we handle procurement, quality checks, logistics, and ensure everything arrives on time and meets your specifications.

Installation

Our skilled technicians set up and connect all equipment at your location. We handle the physical work: mounting, wiring, piping, and assembly, so you don't have to worry about the technical complexities of getting everything in place.

Testing

Before handover, we thoroughly check that every component works correctly. We run performance tests, safety checks, and verify all systems meet required standards. It's like a detailed inspection before you take ownership of your new equipment.

Commissioning

We fine-tune everything and train your team to operate the systems confidently. This final step ensures smooth daily operations, optimal performance, and your staff knows exactly how to maintain and use their new equipment effectively.
